Architectural Commercial Institutional Residential

Specifications

120° Angle Bar with post and snap on / twist-lock concealed flanges. Manufactured by ELCOMA from 18 gauge, type 304 stainless steel, satin finished, tubing. 14 gauge stainless steel mounting flanges, heliarc welded to the tube to form a single structural unit. Elcoma Grab Bars are made standard with 1.5" wall clearance and are designed, built & tested to withstand 400lbs. (181kgs) of load when properly installed.* This exceeds HUD, FHA, VA, ADA, ANSI and other federal, provincial, and local codes. *Grab Bars can only be as strong as what they are mounted to. It is imperative when installing any safety product to consult with a qualified contractor to insure you have sufficient backing.

Custom sizes are available to suit special requirements.

The exclusive ELCOMA concealed flange system adapts both "Twist-Lock" and "Snap-On" compatibilities making installation a breeze. ELCOMA 120° Grab Bars come in 1.25" & 1.5" Diameters with a variety of finishes & coatings.
